

Chintan = *thinking in Sanskrit*

Amit = *infinite in Sanskrit*

Who are you... **and** why
are you **here**?

The **Chintan Project** empowers businesses to discover their larger purpose, draw strength from the challenges they face, and leverage their unique offering to impact the world.

Born out of the perseverance, certainty of purpose, and unique insights of its founders, Amit Chintan Ramlall and Kumar Ramlall, the Chintan Project is designed to help others follow their own underlying purpose - their own North Star.

At Chintan, we believe that your purpose, your resources, your strengths, and your challenges are unique. Making your greatest difference comes from leveraging this unique combination. For many, their thinking is the bottleneck between good to great. We help you to stress-test your current paradigms of thought, and present alternative models to facilitate learning and growth. You blast past the thinking bottleneck so that you can focus on your and your company's secret sauce to grow services and impact, profit and value in your company. You grow and evolve and so too do your relationships and business.

My time with the Chintan Project team was genuinely transformative in hindsight. I now have a variety of new paradigms, epiphanies, insights, and models from which to draw. My challenges and difficulties haven't disappeared, but my approach to them has completely changed. I see them for what they are vs. what I was making them out to be. And this is making a world of difference in my life and my career.

Jared Smith, Advisor, Entrepreneur, Investor & Speaker

The Ramlalls are renowned in their abilities as Human Behavior Advisors, using their expertise and experience in human awareness and behavior, to help clients understand and leverage the various pathways to success and achievement.

Adapt to Change, Find Purpose, Focus on Goals

About Founder
Amit Ramlall

Amit's start in life was challenging - diagnosed with Autism Spectrum Disorder from an early age, doctors were uncertain if he would survive to adulthood. Not only did he survive, but he thrived, learning to read by age 3 and discovering an appetite for the most brilliant thinkers in multiple disciplines including human behavior and psychology, philosophy, economics, the growth and development of individuals and businesses, sociology, and how Universal laws apply to human achievement. Amit's insights are sought-after by business owners, professionals, professors and scientists from around the world.

I've been able to incorporate Chintan Project's suggestions around overcoming my worry connected to delegation, saying no, and prioritizing the things in my life that actually matter to me...

Dr. Vivek Dhawan, MD, FRCPC Respiriology & Internal Medicine
Specialist Physician

"They helped each one of us [as the leaders of our family business] to understand how we each served through our personal purpose to a common purpose... it is from the inside - a deep awareness of our gift, our unique contributions..." As a result, Sandra's family business now has a clear roadmap of what and how each family member is going to be involved, which has helped them grow their individual and collective impact and rewards.

Sandra Zorrilla Mc Lellan de Landa

Real Estate & Community Developer

About Founder
Kumar Ramlall

Dr. Kumar Ramlall is an entrepreneur, physician, and a sought-after consultant for business leaders and family enterprises. As a physician, he has worked in private practice and in academia and has built thriving clinics and a medical diagnostics company. He built a provincial service serving a population of one million people, is a nationally recognized educator, and chaired the Royal College Examination Board in his specialty. When Dr. Ramlall and his wife Pratima had Amit they began a journey into the realization of human potential regardless of circumstance - a process that Amit embraced, refined, and leveraged in order to help clients worldwide.

Amit Ramlall transcends wasteful processes, and he launches into deep discussions within seconds to minutes. He provides a challenge to thinking that I haven't experienced with any other person in my lifetime.

Dr. William Padula, world-recognized Neurological Scientist
